

CYBER TRAINING MADE FUN. DELIVERED FAST. PROVEN EFFECTIVE.

Mimecast Awareness Training delivers effective, engaging security training. Our training changes employee behavior and reduces security risk. We address the issues that matter and cover high stakes security topics identified by top CISO's as the ones that keep security professionals up at night.

We also integrate easy to deploy and administer phishing simulations and have developed industry leading employee risk scoring capabilities so you can identify whom your riskiest employees are.

BUT DON'T JUST TAKE OUR WORD FOR IT. HERE'S WHAT SOME OF OUR CLIENTS HAVE TO SAY.

"Mimecast Awareness Training engages our workforce in a whole new way, entertaining and very effective... and the platform aligns perfectly with the positive, empowering culture we're striving to foster."

*Tim Murphy, President,
Thomson Reuters Special
Services, LLC (TRSS),
Former Deputy Director, FBI*

"In the crowded field of cyber security training, Mimecast Awareness Training stands apart. Not only is the training content engaging (employees actually look forward to the next video), but their analytics enable a new and holistic approach to improve a company's overall security culture. What we spend on Mimecast Awareness Training is probably our best spent security dollars, - a foundational element in managing cyber security risk."

*William Hammersla, Chairman, Utilidata,
Fmr CSO, Forcepoint
Fmr President, Raytheon Cyber Products*

"I've been involved with enterprise security awareness for decades, and have barely found anything as compelling and fun as the content from Mimecast Awareness Training. Their video approach is an amazing way to move culture, and I suspect CISOs will really like their emphasis on risk analytics as well."

*Dr. Edward G. Amoroso,
CEO, TAG Cyber LLC,
Former SVP and CSO, AT&T*
