Certification Program Guide

Mimecast Education Certification Program

Program Overview

Mimecast Education offers a two-level certification program. Mimecast Certification assures you to achieve mastery at the highest level of Mimecast expertise, giving you the peace of mind for business-critical cyber security solutions.

Warrior: This is our Fundamental level of training. This is our first level of technical training, designed to give you the fundamentals of the key features of Mimecast products and the knowledge you would need to understand and get started with your Mimecast solution.

Gladiator: This is our Advanced level of training. Gladiator builds on the Warrior courses and foundational product knowledge to take your capabilities to the next level and stay secure with the ever-changing threat landscape. The courses in this track will teach you how to configure and troubleshoot Mimecast products based on common configurations and scenarios.
