

Email Security 3.0

Governance & Compliance

Resilience Extensions

Tame Complexity, Reduce Costs, Mitigate Risk

Modern-day data management represents a high degree of complexity and an increasing amount of risk, as massive volumes of data converge with increasingly stringent restrictions.

From enforcing policies and reducing legal exposure to making data retrieval fast and easy, you need to tame complexity, minimize risk, reduce costs, and decrease the burden on already over-taxed resources. Mimecast helps you do just that with an industry-leading Cloud Archiving solution that's been listed as a leader in the Gartner Magic quadrant for five years running.

Simplify Compliance

Remove the guess work from compliance by automating the application of customer or regulation-defined retention policies, like SEC 17a-4, the EU GDPR, and requirements set by the SEC or FINRA.

Email Security 3.0

Mimecast Email Security 3.0 helps you evolve from a perimeter-based security strategy to one that is comprehensive and pervasive, providing protection across three zones. These protections are enhanced by a wide range of complementary solutions, actionable threat intelligence, and a growing library of APIs.

Ecosystem & Threat Intelligence

Mimecast Cloud Archive helps you reduce risk, cost, and complexity and control audit readiness, with capabilities such as:

- Self-service administration that allows legal and compliance teams to set or modify retention and deletion standards
- Encrypted, secure storage in multiple geographically-dispersed data centers with triple redundancy
- Complete chain of custody and audit reporting
- Cloud-based, WORM compliant storage

Accelerate E-discovery

Search millions of records in seconds and streamline case management with best-in-class E-discovery search and collection, legal hold and review capabilities, and self-service tools for legal and compliance teams.

You'll get greater visibility and control through early case assessments and reduce third-party costs, while also minimizing the burden on IT, with capabilities that include:

- Centrally managed and rapidly deployed litigation holds
- Fast, effective case review with automated culling to significantly reduce third-party costs
- Self-service search and access for legal and compliance teams
- Rapid Early Case Assessment End-User Search

Real-World Scenario

Angela works as a lawyer for a mid-sized organization and asked Meghan, their Director of Infrastructure, to help with a case. She needed Meghan to put a hold on 14 mailboxes and pull all the emails sent or received from them for the last two years. Surely, Angela thought, it couldn't be that difficult. If only that were the case. Meghan jumped on the task; but after two weeks of running searches and gathering data, she was still missing six months of mail. To make matters worse, one user's PST files were corrupted. Without a separate archive in place, the data was permanently lost, and Angela was left trying to figure out how to proceed without critical information she needed for her case.

How Mimecast Would Have Helped

- Best-in-class E-Discovery would have dramatically reduced the time required to search for emails
- Centralized litigation hold would have simplified the process of identifying and retaining relevant emails
- An immutable archive would have ensured no data was lost

End-User Search

Balancing employee expectations for anytime, anywhere access to information with the need to enforce compliance and governance policies is a challenge. Get the best of both worlds with Mimecast Cloud Archive, which provides intuitive desktop tools and mobile applications that let employees work smarter without sacrificing administrative control.

End-users have:

- Rapid access to their complete archives – backed by the fastest search in the industry
- Instant access to all live and historical email when primary mail systems are unavailable
- Self-service security features, including spam and phishing reporting, managed sender lists, and hold queues

Mimecast Cloud Archive's capabilities can also be extended with complementary solutions that include Supervision, Sync & Recover, Case Review, and Long-term Retention.

Simplify and Streamline Information Governance with Mimecast

- Comprehensive regulatory, E-discovery, and litigation support through compliance-driven chains of custody and fully indexed archive.
- Seamless migration of live and archived email data to Office 365 and other cloud environments.
- User empowerment via an Outlook® add-in, Mac app and mobile apps for iPhone®, iPad, Android®, Windows Phone® and BlackBerry® devices.
- Fast, accurate first-pass review for email in response to audits, investigations, and legal requests.
